

Global Rehabilitation System

**Global
Community
Network**

**Scanner Brightly -
System for Corporate
Policy Enforcement
Through Public
Oversight**

**System for literally
scanning items at any
store to obtain
information about the
manufacturers business
practices.**

**System for linking purchases
desires/intentions/actions into
large action corporate
takeovers against malevolent
business practices.**

**ASH:ES - Community
Rehabilitation Through
Individual Recognition
and Respect**

Maintain an autonomous network of safe havens in accordance with prescribed guidelines and best current practices.

**Maintain a heuristic
structure for deployment
of autonomous nodes
and the system which
connects those nodes**

**Maintain a list of
methods for
interacting with all
other similar
organizations**

**Facilities generally would
have a working business
model and a means by
which to non-exploitatively
employ people abilities**

Systemic interconnect would facilitate individuals find their ideal location, to move fluidly and to maintain a stable living flow while simultaneously ensuring stable operations flow.

**Systemic Interconnect would
facilitate businesses to enlist
workforce more fluidly
according to tasks and to rely
on a method of vouching for
people's skills directly**

**Desert
Terraforming
System**

**Reversing
desertification is
critical to stabilizing
our climate change
patterns**

**Critical to all
methods is the
availability of
water.**

**The Water Movement,
a project of the Global
Community Network**

**Baqueduct: Concentrated
Solar Steam Pipeline -
Sustainably bringing water to
the places where our earth
needs hydration in order to
create life**

**Concentrated Solar
Desalinization -
Sustainably creating
fresh water using heat
from our local galactic
power source**

**Solar Power Generation -
By transferring the sun's
focused heat through
steam turbines.**

**Hydroelectric Power
Generation - After pumping
water to the top of a
mountain, we simply let it
fall artistically down the
other side.**

**Systems to deploy
massive crop
placements into
desert regions.**

**This provides a
significant source of
ongoing temporary
jobs.**

**This would basically
be a rolling work
party with live
music.**

**Aeronautics Industry
Revolutionization -
Deployment of Solar
Powered Light-Than-Air
Vessels Worldwide**

**Bring current airlines into fold
by offering a means by which
to lower expenses by removing
fuel from the budget while
increasing service offerings.**

7-day/7-location
"Festival-City" Launch
- Permanent Party
Transitional Centers

**Centers function as
sustainable nodes,
representing a model
for healthy
community.**

**Centers function as a means
by which to transition people
from the failing dominant
culture into any of a variety of
opposing models.**

**Automotive Industry
Revolutionization -
Massive Deployment of
Solar/Hydrogen Vehicles**

**Proportional provision of
energy to automotive
companies who make the
change retroactively and
voluntarily support legacy
vehicles by a certain date as an
incentive**

**Under current legislation,
simply classifying certain
materials as controlled
substances would require the
manufacturers to make
necessary changes**

**Ideally this would be
unnecessary by
offering a better
choice which is
mutually beneficial.**

Gov 2.0b

Direct Democracy

**Votable issues
can be filtered
with per user
settings.**

**Option to only see
matters when some
percentage of the
population has voted.**

**Option to see the
matter when
friends/family have
viewed/voted on the
matter.**

**Option to see the matter
only when it has reached
quorum and action is
now pending standard
waiting period.**

**Static and Dynamic
voting options
selectable by the
voter**

**Representation of
another's vote is
allowable at the sole
discretion and
unencumbered consent
of the voter.**

**Elected officials hold
office to perform the will
of the people, not to
represent our opinion.**

When running, candidates would be furnished a public list of the duties which have been already voted as the tasks which the office is to oversee.

**When elected, officials have a
schedule of approved
government actions and are
responsible for executing
those orders roughly as they
told us while campaigning.**

**Limited emergency
powers would be
grantable for specific
matters by a vote of
the people.**

**Government action would
be delayed some standard
waiting period after vote to
allow for any truly opposed
to conscientiously object.**

This is especially key in matters where perhaps there was a large represented vote which was contrary the will of the people.

**Scanner Brightly -
System for Government
Policy Enforcement
Through Public
Oversight**

**Tool for continuous
recording of public
opinion with authority to
remove people from duty
if they are deemed
publicly unfit**

Global Rehabilitation System
